

Abdelrahman Hassan Mohamed

Back-End Developer | Laravel

✉ abdelrahmanhasan020@gmail.com ☎ 01004732940 📍 Egypt - Mansoura 🌐 LinkedIn 🐙 Github

SUMMARY

Motivated Computer Science student majoring in Software Engineering with strong expertise in Laravel (PHP) and back-end development. Skilled in building secure, scalable APIs and optimizing database performance using MySQL and Redis. Passionate about writing clean, maintainable code and continuously improving through learning modern technologies and best development practices.

EDUCATION

Faculty of Computer & Information Sciences - Mansoura University 10/2023 – 10/2026

Faculty of Computer & Artificial Intelligence - Beni-Suef University 10/2022 – 06/2023

PROJECTS

DiagnoSense 📁, Laravel, MySQL & RESTful APIs

Graduation Project

An AI-powered medical platform designed to help doctors analyze patient medical records, extract clinical data, and compare test results in one place. It provides intelligent medical summaries and an AI chatbot to simplify patient data analysis and support clinical decision-making.

Smart Learn 📁, Laravel, MySQL & RESTful APIs

Smart Learn is a comprehensive e-learning platform designed to simplify the learning process and educational content management. It enables students to access online courses, take quizzes and exams, complete assignments, and earn certificates upon course completion. The platform also features a secure authentication system for managing user accounts and controlling access to its services.

AZUL 📁, Backend Developer | Team Project at Aeroenix Company

Contributed to the development of Aeroenix, an AI-powered customer service platform for hotels, as part of a development team at Aeroenix Company. Integrated Meta APIs to manage guest conversations across social media, automated customer interactions using AI, and implemented real-time notifications, conversation assignment, and centralized guest support management to streamline hotel communication and improve service operations.

Motafawweq 📁, React.js, Laravel & MySQL

A large-scale educational platform designed for students, teachers, educational centers, and parents. It offers an integrated learning environment featuring lesson management, interactive assessments, AI-powered speech-to-text and mind maps, and comprehensive educational center management. The platform has been successfully deployed to production and is live and accessible online.

EZMoney, Laravel, MySQL & RESTful APIs

EZMoney is a comprehensive financial management mobile application designed to simplify expense tracking, budgeting, and financial planning. It provides users with an intuitive mobile experience to manage their finances, monitor spending, analyze financial data, and make informed financial decisions through interactive dashboards and detailed reports.

TRAINING

PHP Back End Developer Intern, Information Technology Institute (ITI)

07/2025 – 08/2025

Training focused on PHP and Laravel fundamentals, building RESTful APIs, and working on back-end development best practices.

SKILLS

Backend Development Laravel (PHP), RESTful API Design & Development, Authentication & Authorization (Sanctum, Middleware, Policies), Eloquent ORM & Database Relationships, Blade Templates Caching & Queues (Redis), Unit & Feature Testing (PHPUnit)	Database MySQL (Schema Design, Migrations, Seeders), Query Optimization & Indexing, Database Transactions, Redis (Caching & Session Management)
Programming PHP, C++, C#, Python, OOP, DataStructure, Algorithms	Tools Git, GitHub, Unit Testing, VS Code / PhpStorm, XAMPP, Apache, AWS EC2
Soft Skills Research, Team Work, Time Management , Communication Skills	Frontend HTML5, CSS3, Bootstrap, jQuery, JavaScript

LANGUAGE

Arabic — Native/Bilingual

English — Fluent
